WORKING WITH

**MEIER-BRAKENBERG**

TO SUPPLY WEIGH SCALES AND PLATFORMS

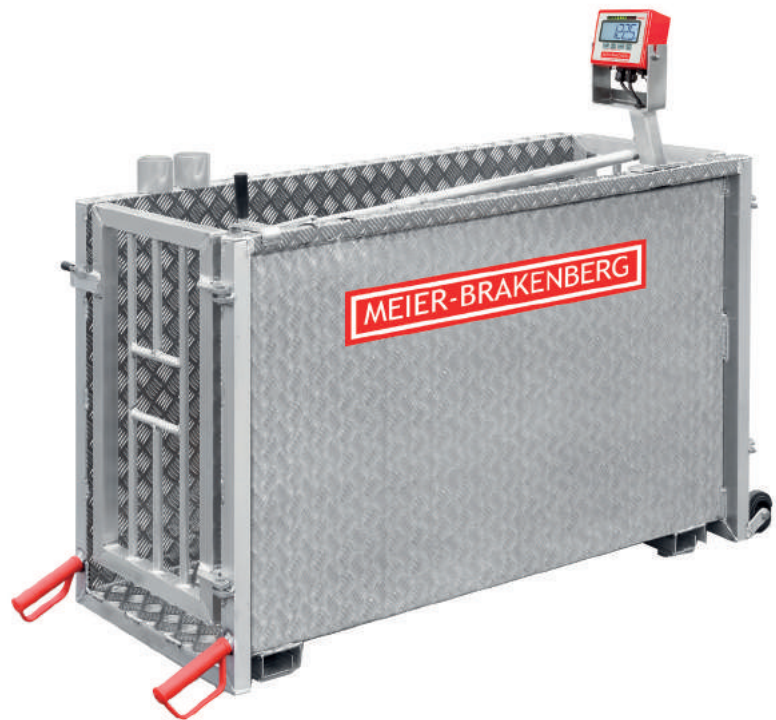

- Lightweight Aluminium Construction
- Impact Resistant Balance Beams
- Reverse Herding Feature
- Easily Transported / Very Manoevable
- Low Ramp Height
- Narrow Design - good for Confined Spaces
- Battery Powered
- Weight Range up to 1,000kg
- Standard Size - 58cm x 175cm x 92cm

OTHER SIZES AND MODELS  
AVAILABLE ON REQUEST

# INDIVIDUAL PIG WEIGHERS

mobile

Weighing improves economic efficiency. Our mobile single animal weighing machines are specifically designed for sorting pigs for slaughter. These scales facilitate comfortable and stress-free weighing inside or in front of the pens. The standard repel gate provides two options. Firstly, inside large pens you can open the door by remote control to let the animals exit the scales. Secondly, in small pens you can weigh the animals on the aisle since it is possible to make the animals exit the back door of the scales to enter back into the pen.

# BATCH WEIGH PLATFORMS

Various Sizes Available as standard or bespoke

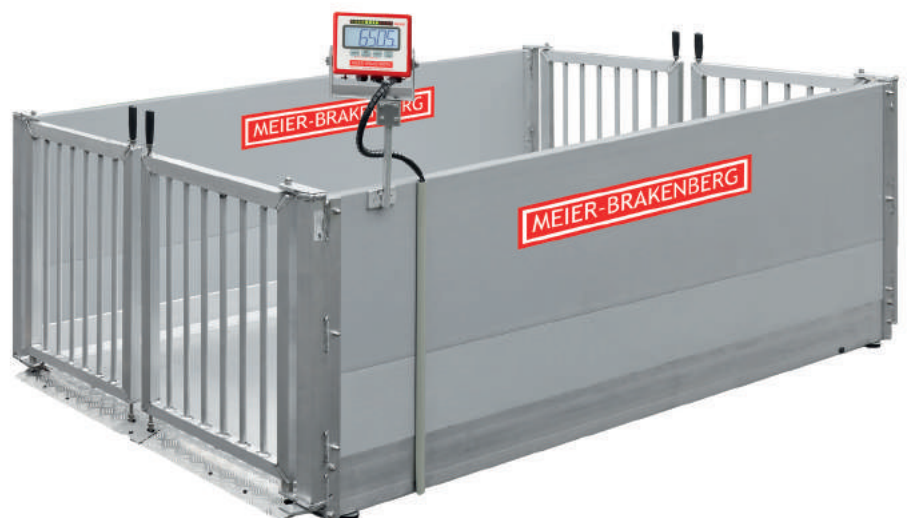

Remote Gate Operation by Pedal

- Ramp height only 2cm - this combined with narrow spacing of vertical rails gives flexibility to use platform for all sizes of pigs
- Ingenious transport mechanism - enabling movement around the building and precise positioning
- Two way gates can be opened both outwards and inwards - for full flexibility
- Bespoke build available if specific features needed- eg. side gates.
- Mains or rechargeable battery power.

Practical, Premium Quality Weigh Platforms with solid aluminium construction.

*Lincolnshire pig producer says* “it is quick, simple and accurate. It’s very efficient because of its size and the simple digital read-out. We have just weighed 353 pigs in less than 1 hour.”

3 Standard widths - 1.1m, 1.4m & 1.8m - with lengths from 2.1m to 5.1m.

- Different animals need individual solutions
- Special designs are available
- Please contact us if your requirements are more specific

## PIGLET WEIGHERS

The mobile piglet weighing machine is specially designed for weight control and determination when managing piglets. The scale comes to the animal to minimise stress for humans and animals. The weighing scales are suitable for up to 10 piglets of 30kg each.

Standard size -  
2.5m x 0.9m x 1m

## WEIGH HEADS

WA300 Weigh Head is simple to use, reliable and robust. The bright lit digits lock quickly to the weight and rebalance automatically.

The traffic light system enables rapid sorting. Set the target weight and the green light shows when this is achieved. Weights above and below target are shown by red and yellow lights.

Now equipped with a USB port for data export.
